

# SURVEILLANCE AND SECURITY MADE SIMPLE!

**SURMOUNT**  
Innovation to Integration

## SecureTrack

Rapid urbanization is exposing us to various challenges. These include the risks of theft and terror attacks owing to the great social divide that is creeping into our society and the threats of fire and natural disasters like earthquakes and floods which are becoming more and more common today. Faced with such imminent risks, security and surveillance systems are becoming indispensable.

Surmount, a leader in open architecture based building automation has created customized solutions to counter these emerging challenges. Presenting SecureTrack™ a suite of safety, security and surveillance solutions that you can use to protect your active work establishments or remotely located unmanned sites. These cost-effective and easy-to-install systems that can be accessed from any location with Internet connectivity.

The SecureTrack™ suite of security and surveillance solutions are aimed at ensuring the safety & security of your property and human resources. Using SecureTrack™, you can watch, record and play-back data from up to 64 cameras. You can record data based on motion, time or

events. You can also burn the video that is being recorded directly onto a CD or DVD. It can integrate alarms, fire and access controls with the system. It can also monitor the happenings remotely as the system designed helps you check videos real-time using any computer with internet connection. Not just that, by integrating SecureTrack™ with alarm systems and access controls, you can create a system to receive e-mail and SMS alerts in the event of any emergency or breach.

## HEALTHCARE

With the medical industry going rapidly, there is also a need to ensure the high level of security for patients, patient records, and hospital staff. Hence hospitals require stringent access control and monitoring. Surmount has solutions to fit the needs of all types of medical facilities-be it, a small clinic or a large hospital.

## HOSPITALITY

The hospitality industry is booming. Management at hotels is constantly trying to ensure that they have a safe, secure and clean environment for their guests. Even a single security or safety incident can lead to tremendous loss of revenue in a business where reputation and service is everything. Constant watch through a Surveillance systems is a key solution to achieving this security.

# SURVEILLANCE SECURITY MA

## SCHOOLS & INSTITUTIONS

Surveillance systems can help reduce willful damage to school property thereby cutting refurbishment costs for schools and delivering a measurable return on investment, while also ensuring the safety of staff and students during school hours. Whether it's just one store or a chain of stores that you want to monitor remotely, our surveillance system can help you do it.

## RETAIL CENTRES & MALLS

Shopping malls and retail centers are susceptible to criminal activity, since they are frequented by large crowds and generally have a lot of cash dealings going on. Besides, most shopping malls and retail centre consist of large open plazas, multiple levels of shops and parking areas, food courts and these days, even movie hall theaters. Our solutions can help retail centers, and malls reduce incidents of thefts and shoplifting, while also ensuring the safety and security of customers and staff.

## RESIDENTIAL SOCIETIES

Apartments are now a part of every cityscape. An apartment complex faces threat from elements in the Neighborhood, visitors, vandals and whether it's vehicle safety, personal safety or loitering, our surveillance systems can take care of all security needs of a residential complex.

## OFFERINGS

- 24/7 Live streaming video based surveillance
- Internet based access to video stream or still pictures
- Software that allows remote control of cameras for pan/zoom/tilt requirements
- Digital Video Recorders to record footage for access at any time
- On-line storage for archival footage offered at remote location
- All-weather camera casings that support wipers, fans and heaters for uninterrupted coverage
- Our service and support for design, installation and ongoing maintenance

# E AND DE SIMPLE!

## HIGH-RISE

High rise apartments are fast becoming a norm today. Most high rise apartments offer an elegant lifestyle replete with fitness zones, and recreational amenities like swimming pool or parks and lawns. However, security concerns are equally strong as well. Monitoring the entrance and exit of visitors, ensuring the safety of residents is not an easy task. This is where our surveillance systems can help. Whether it's the building lobby, entrance or the parking lot, it can be remotely monitored using our surveillance system.

## CINEMA HALLS

With multiplexes springing up everywhere in the country, cinema goers are having a great time. However, having more than 200 people at one location at one time poses a huge security threat, including terror attacks and bomb scares. Our surveillance systems can help you mitigate such threats effectively.

## WAREHOUSE

Your Warehouse is one of the most important aspects of your business as it is the place where your inventory is stocked. Burglary, ambush or sometimes even fraud and theft by employees are security threats for your inventory and warehouse. Using our surveillance system you can mitigate both external and internal security threats effectively. Our system can provide you complete surveillance and help you identify the threats on time, allowing you or your security team to take pre-emptive action.

## ADVANTAGES

- Real-time remote monitoring via internet enabled devices
- Wide range of scalable, integrated solution based on GSM and 3G technology
- Cost-effective and reliable
- Easy installation and maintenance
- Designed to retrofit or integrate with existing systems
- Designed to work on GSM network available across the country
- Centralized control point to monitor multiple areas or projects

# Taking the **LEADERSHIP ROLE**

Surmount is a leader in design and implementation of open-architecture based building automation and security solutions. Surmount's projects range from airports, large commercial buildings, to hotels, hospitals and townships. Surmount's system driven approach and relationship with international players in the security systems space helps in creating secure and affordable solutions. Surmount's competency in the area of real-estate, building

construction and automation industry around the globe provides a vantage point in arriving at highly economically viable solutions for creating safe and smart cities. With a team of 200+ highly-qualified professional analysts including Automation Experts, Engineers, Researchers, BIM experts, Energy Auditors, Commissioning Agents, and Financial Analysts, we will be pleased to assist you in your next project.
